- Assisted in organizing and promoting GDSC events like coding workshops.

PROJECTS

HeinReach

This project allows users to seamlessly explore a diverse range of products, utilize a convenient shopping cart, apply smart product filters, and effortlessly proceed to checkout for a streamlined and secure shopping experience.

Viva Quest

This project is based on how an effective travel website will make us feel. It is based on a traveling website with fully-featured functions that will activate the traveling bug with vibrant imagery. This website contains highlights of some important places along with high-quality photography and allows people to book their dream destination

Xpress

Xpress is a delivery management system offering real-time visualizations and client notifications when items reach pickup points, ensuring efficient tracking and enhanced customer satisfaction.

Retino

Retino is a web application managing diabetic retinopathy, offering education, analysis, trend tracking, and prediction to enhance patient care and prevent vision loss.

CERTIFICATION

Network Addressing and Basic Troubleshooting

Completed a certification course provided by Cisco Networking Academy

Introduction to Cyber Security

Completed a certification course provided by Cisco Networking Academy

Introduction to Data Science

Completed a certification course provided by Cisco Networking Academy

Python Essentilas 2

Completed a certification course provided by Cisco Networking Academy & Python Institute
